

Valencia Water Company

Is Offering

Free Water Survey and Analysis

**For Commercial, Institutional and Industrial Customers
Including large Landscape HOAs**

As a part of Valencia Water Company's commitment to its business and institutional customers, VWC is offering this free service to aid in meeting the voluntary drought reduction goal of 10%. These water management surveys aim to identify water efficiency opportunities that will reduce water costs without negatively impacting existing operations.

This confidential survey entails an on-site evaluation of your facility, inventorying indoor water using fixtures and equipment as well as assessing the irrigation system and controller programming. A report with suggestions will be delivered after the analysis is complete.

Given our current water shortages, we are always looking for ways to help save water by using our limited supply wisely. We hope you will avail yourself of this opportunity. If you have any questions, please contact Janet Keith, Conservation Coordinator at Valencia Water Company at 661-295-6531 or jkeith@valenciawater.com
